

Product Sheet Meditropin

Product Name: Meditropin

Pharmaceutical: Fiction Pharma.

Product description:

Meditropin is an oral prescription medication that can help adults who are obese, or overweight (overweight) who also have weight-related medical problems, lose weight and maintain their weight loss. Meditropin should be used in conjunction with a reduced calorie diet and increased physical activity.

Active Component:

Meditropin contains liramexide and chia as a satiator of natural origin.

Indications:

Meditropin is indicated for the treatment of obesity and overweight in adults who have weight-related medical problems.

How to Use:

Meditropin should be administered orally with food as directed by your health professional. The dosage and frequency of administration will be determined by your doctor based on your medical condition and response to treatment.

Warnings:

- It should not be used with other products containing liramexide.
- It is not known if Meditropin is safe and effective when taken with other prescription, over-the-counter, or herbal weight loss products.
- It is not known if Meditropin can be used in people who have had pancreatitis.
- It is not known if Meditropin is safe and effective for use in children under 18 years of age.

Precautions:

- Consult your doctor before starting treatment with Meditropin.

- Tell your doctor about all the medications you are taking, including prescription, nonprescription, and herbal products.
- Do not use Meditropin if you are pregnant or plan to become pregnant, unless directed by your doctor.
- Do not breastfeed while using Meditropin without consulting your doctor.

Common Side Effects:

- Nausea
- Vomiting
- Diarrhea
- Abdominal pain
- Reduced appetite

When to Seek Medical Care:

- If you experience symptoms of pancreatitis (severe pain in the abdomen that may radiate to the back).
- If you have a serious allergic reaction, such as swelling of the face, lips, tongue or throat, or difficulty breathing.
